

Alternative Breeds
2025

TAKE CONTROL OF YOUR BREEDING DECISIONS WITH FARMOPS

FARMOPS OFFERS YOU KEY INFORMATION AND INSIGHTS IN REAL TIME ENSURING THAT YOUR BREEDING GOALS ARE ACHIEVED.

FarmOps provides you with six daily breeding insights with your heifers and cows calculated separately so that you can track your progress day to day and week by week, right through the breeding season to achieve the best possible outcomes.

Due for Repeat

In heat/served 18-24 days ago

[VIEW COWS](#)

We will show you the number of cows and heifers that could repeat today.

These are the animals to keep a close watch on in cases of a repeat.

Expected in Heat

We will estimate the number of cows and heifers that should be on heat today.

Valid Serves

We will count your serves each day and check how many are valid.

Not Served

Calved 35 days & not served

[VIEW NOT SERVED](#)

We will show you the number of cows and heifers calved 35 days that are not served.

This will help identify animals with problems easily.

Potentially Empty

We will calculate each day the number of cows and heifers that are likely to be empty in the herd.

Stockbulls Required

We will show you how many mature fertile stock bulls that would be required to serve the potentially empty animals in the herd.

- ✓ DUE REPEAT LIST UPDATED DAILY
- ✓ WORKS FOR BOTH DIY AND TECH SERVES
- ✓ PRINTABLE BREEDING CHART
- ✓ ALL DATA SENT AND RECEIVED FROM ICBF

UNBEATABLE VALUE!
