

Alternative Breeds
2026

Forenote

DR. FÍONA DUNNE

Dairy and Beef
Programme Manager

As we approach the 2026 breeding season, we are delighted to present our most extensive Alternative breeds catalogue to date. As you may know, ICBF have updated the Base Cow population that underpins the EBI, so although the EBI figures of these carefully selected sires have been readjusted to the new base, the same exceptional genetics persists. Not to mention, we are featuring an extensive range of breeds and sires from trusted international suppliers, such as Viking Genetics, Semex, ABS and KI Kampen to name a few. The 2026 collection of sires within this catalogue reflect Munster Bovines on-going commitment to continuing genetic progress and driving performance at herd-level. And with that, we wish you the best of luck with the breeding season ahead.
